

Aurel De Vince VEHI

PhD Candidate in Applied Economics • Firm Transformations • Innovation & Sustainability • Economic Intelligence • Regional Economies

☎ + 33 7 53 76 86 87 | @ aurelvehi@outlook.fr | 🌐 [website](#)

Doctoral researcher in Applied Economics, specializing in econometrics and quantitative analysis. My research focuses on economic intelligence, business maturity and regional development, with particular attention to the harmonization and analysis of heterogeneous data for evidence-based decision-making.

SKILLS

- **Scientific & Professional Skills:** Research Design, Literature Review, Analytical Thinking, Scientific Rigor, Problem Solving, Research Project Management, Interdisciplinary Collaboration, AI Fluency ([Certification](#))
- **Econometrics, Statistics & Machine Learning:** Time Series, Panel Data, Spatial Econometrics, Causal Inference, VECM, VAR, ARDL, Ordered Logit, Composite Indicators, Statistical Evaluation, Machine Learning, Deep Learning, Neural Networks, LSTM, Attention Mechanisms, Predictive Modelling
- **Programming & Infrastructure:** Python - Pandas, NumPy, Statsmodels, Scikit-learn, PyTorch ([Certification](#)); SQL – PostgreSQL, MySQL ([Certification](#)); R ([Certification](#)); Stata; MongoDB; Git/GitHub; APIs; Power BI, Excel/VBA
- **Languages:** French (Native), English (Professional), Spanish (Basics)

EXPERIENCES

Doctoral Researcher | ESTIA Institute of Technology – ESTIA Recherche | *Bidart* (2026-2029)

Research on the design of a harmonized analytical framework for cross-border economic intelligence, integrating heterogeneous business data to produce comparable and actionable knowledge.

Research Assistant | ECOSEAS Lab x Centre Scientifique de Monaco | *Nice-Monaco* (2025)

Conducted a France–Costa Rica econometric study of illegal fishing, assessing its economic losses, ecological impacts and institutional determinants through multi-source time-series analysis.

Project Officer | Centre Scientifique de Monaco | *Monaco* (2024-2025)

Contributed to a global valuation framework for marine natural capital, integrating environmental and economic data to estimate blue carbon wealth across 200+ countries.

Financial Data Analyst | Family Sphere | *Nice* (2023)

Developed automated financial reporting and management dashboards for cash flow, budgeting and variance analysis, reducing monthly reporting time by approximately 15 hours.

EDUCATION

Master's degree – Economics | Université Côte d'Azur (2023-2025)

Advanced training in econometrics, data analysis and applied economics, with a focus on quantitative methods for economic research and decision-making.

Bachelor's degree – Economics & Management | Université Côte d'Azur (2020-2023)

Multidisciplinary training in economics and management, covering microeconomics, macroeconomics, statistics, finance and quantitative methods.

PROJECTS

ECONOMIC INTELLIGENCE SYSTEM FOR U.S. MARKETS

Design of a financial intelligence system integrating macroeconomic, financial and policy data into a harmonized analytical framework. Development of the data infrastructure, indicators and statistical analysis to feed a webapp.

Stack: Python, PostgreSQL, DuckDB, Parquet, SQL, APIs, pandas, Statsmodels, Scikit-learn, Git/GitHub

BAYESIAN ECONOMETRICS & STATISTICAL MODELING

From-scratch implementation of OLS, Ridge, Bayesian regression and Empirical Bayes on economic data. Focus on parameter uncertainty, shrinkage and robust statistical estimation. Pedagogic project.

Stack: Python, NumPy, SciPy, pandas, Jupyter Notebook

PUBLICATIONS & MANUSCRIPTS

Hilmi, N., Vehi, L.A.D.V., Treskova, M. *et al.* Global assessment shows blue carbon wealth dominated by ocean processes and unevenly distributed across countries. *Commun. Sustain.* **1**, 114 (2026). <https://doi.org/10.1038/s44458-026-00117-8>
